Mobile Users

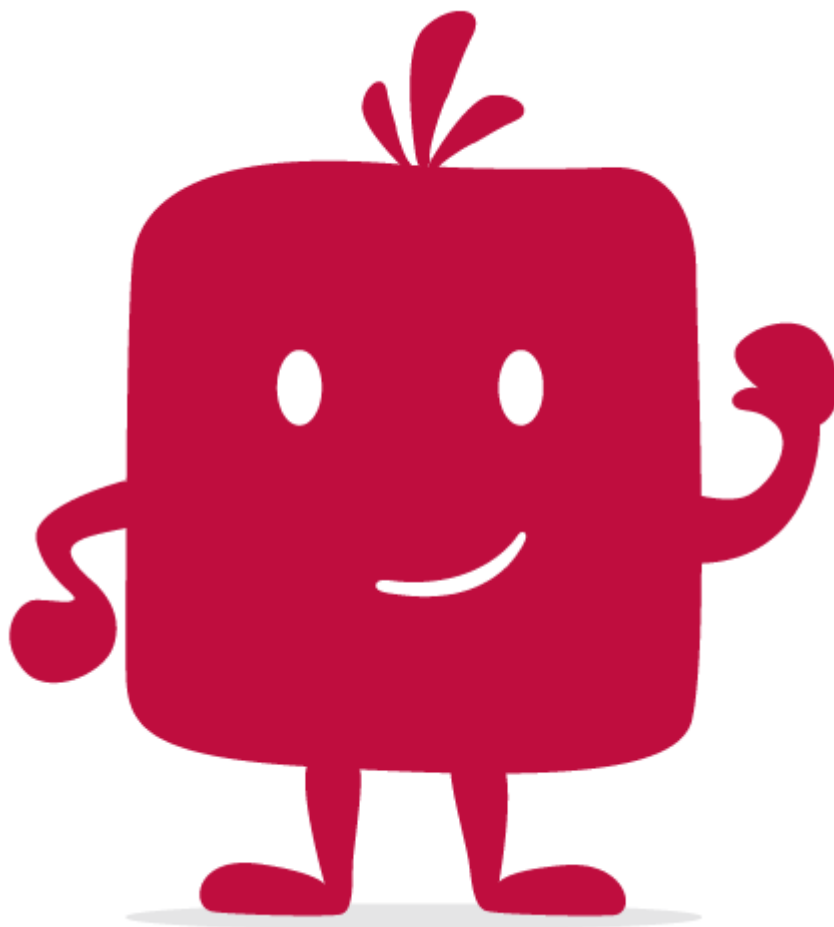

The management of the mobinautes is based on 3 parts:

“Mobinaute” : List all the mobinautes, access to each record, create, delete, etc...

“Group”: Create, modify, delete a group. Display of the mobile users associated to each group.

“Profile”: Add, modify or delete profile fields

It is advisable to clearly define all the groups as well as the information contained in the profile before creating the mobinautes.
