Group

Groups allow to gather mobile users in order to manage the permissions of protected contents (access rights) and to define push notification mailing lists.

The groups table displays :

- The form label
- Active Group (Y/N)
- The number of mobile users assigned to the group
- The action buttons :
 - Edit Button (Edit Group)
 - Duplicate Button (Duplicate without the mobile users)
 - Delete button (after confirmation)

Add Button: Switches to Edit Mode to add a group

Button Export CSV: Download a CSV file (Excel) with all groups

Libellé	Actif	Nombre de mobinautes	Action
Comité de Direction	Oui	0	  
Shapper demo system	Oui	0	 
Techniciens	Oui	0	  
Utilisateurs	Oui	1	  

Editing a group allows you to enter a label and define whether the group is Active or not. The assignment of mobile users to the group is made through 2 lists (with filtering on first name and surname):

- Mobile users not assigned to the group
- Mobile users assigned to the group

By clicking on a mobile user, he goes from one list to another.

NB: If the App has more than 300 mobile users, the assignment of a mobile user to a group must be done from the mobile user edit screen.

The screenshot shows a web interface for managing a group of mobile users. The page title is "GROUPE DE MOBINAUTES". At the top right, the user "Jean Martin" is logged in. The main content area has a label "Techniciens" and an "Actif" toggle switch that is turned on. Below this, there are two columns of mobile users. The left column is labeled "Non affecté à" and contains one user, "Jean Dupond". The right column is labeled "Affecté à" and contains one user, "Jean Martin", who is highlighted in red. A double-headed arrow between the columns indicates that users can be moved between them. At the bottom right, there are three buttons: "Annuler" (red), "Enregistrer" (green), and "Enregistrer et Fermer" (green).
