Announcements

Announcements, or ad campaigns, allow you to display, in addition to the displayed element, other information, for example important news or advertisements .

There are two main types of ads:

- Interstitials : only appear when the application is launched, use the entire screen...
- Banners: appear above certain displayed elements of the app in the form of a banner at the top or bottom of the screen.

A set of parameters allows you to control these announcements in the best possible way.

In order to study the activity of these announcements there are also some statistics
