Parameters

The Form / Settings Menu allows you to manage or create the different forms attached to the selected Application.

The table displays :

- The Form Label
- The Email recipient of the answers to the form
- Active Form (Y/N)
- End date of validity of the form
- The action buttons :
 - Answer Button (Display Answers)
 - Edit Button (Edit Form)
 - Duplicate button (Duplicate without the answer)
 - Delete button (with confirmation)

Add Form Button: Switch to edit mode to add a form

Libellé	E-mail	Actif	Date fin de validité	Action
CR Intervention	contact@mail.fr	Oui	29/12/2017

Editing a form

Editing is managed through 3 tabs :

General tab

- Wording of the form
- Category :
- Single response (Y/N) per mobile user. Case of a survey for example
- Modifiable by the creator (mobile user)
- Displaying response history (application)
- Allow drafts (application)
- On (Y/N)
- Text displayed on the validation button of the form
- Text of the message of validation of the form by the mobile user
- Redirection after validation
- Validity start date and time
- Date and time of expiry

The screenshot shows the 'Général' tab of a form configuration interface. The interface has a dark sidebar on the left with various icons. The main area is white with a header bar containing 'Général', 'Destinataires', 'Données', and 'Constantes Script'. The 'Général' tab is active. The form fields are as follows:

- Libellé ***: Demande d'information
- Catégorie**: Catégorie
- Réponse unique**: ☐
- Modifiable par le créateur (mobinaute)**: ☐
- Affichage de l'historique des réponses (application)**: ☐
- Autoriser les brouillons (application)**: ☒
- Activé**: ☒
- Texte du bouton de validation ***: Envoyer
- Texte de validation ***: Votre demande a été transmise
- Redirection après validation**: Aucun
- Date et heure de début de validité**: 15/09/2016 0:00
- Date et heure de fin de validité**: 29/12/2020 0:00

Recipient tab

- Recipient e-mail(s): multiple e-mails can be entered, separated by “;”
- Recipient e-mail(s): multiple e-mails can be entered, separated by ;
- Reception of the email by the mobile user: if this option is checked, the identified mobile user who answers the form from the application will receive his answer by email when validating the form entry.
- Reception of the mail by :
- Conditional recipients: Allows you to define e-mail recipients who will receive the response for entering a form according to the value of the response data. (See below)

- Default value displayed in the form. It is possible to display in this field, data of the connected mobile user: more info
- If list: list of values in the list with the button " Add a value ".
- Error message text
- Placeholder text input help text

Number		Minimum value	Maximum value	N/A
Date		Minimum value	Maximum value	N/A
Time		Minimum value	Maximum value	N/A
Date and time		Minimum value	Maximum value	N/A
Single selection list		N/A	N/A	N/A
Multiple selection list		N/A	N/A	N/A
Checkbox (Y/N)		N/A	N/A	N/A
Email		N/A	N/A	Number of characters
URL		N/A	N/A	Number of characters
Label : Text display in the form No answer possible	Enter Default value	N/A	N/A	N/A
Photo (via camera or mobile gallery)		N/A	N/A	N/A
Position : GPS coordinates not visible to the mobile user		N/A	N/A	N/A
Digital signature allows you to sign with a stylus or your finger		N/A	N/A	N/A
Phone		N/A	N/A	Number of characters
Scan Code : reads barcode or QRCode		N/A	N/A	N/A
Page break : allows you to define several form screens		N/A	N/A	N/A
Adress1 : allows you to enter in address format		N/A	N/A	N/A
Picture : display an image in the form. No answer possible		N/A	N/A	N/A

Conditional Recipients

In addition to the (permanent) recipients of the responses to the form, it is possible to define conditional recipients who will receive the responses to the form according to a sequence of conditions defined by the values of the responses.

A condition consists of :

- a form field (chosen from the list of profile fields)
- an Operator among a list (for example: equal, different, superior, ...)
- possibly one or more values

E-mail(s) destinataire(s)

Pour un envoi vers plusieurs adresses e-mails, séparez-les par des points-virgules.

Condition de réception

<input type="text" value="Type intervention"/>	<input type="text" value="parmi"/>	<input type="text" value="Vérification"/> <input checked="" type="text" value="Maintenance"/> <input type="text" value="Réparation"/>	
ET	<input type="text" value="Indice noircissement de"/>	<input type="text" value="est supérieur à"/>	<input type="text" value="7"/>
