Attributes

Attributes must be created before products.

A product can be defined with one or more attributes. The attribute makes it possible to decline all the possible variations of the product. For example, a pair of trousers could have as attributes "Size", "Color": for example 4 sizes (S, M, L, XL), 3 colors (Blue, Black, Brown). In this case, there will be 4×3 possible variations: size S in blue, M in blue, L in blue, XL in blue and S in black, M in black etc. For each variation it is possible to enter a different price and image.

Creating an Attribute

In the menu "Shop" then "Attributes" the list of attributes appears.

To create a new attribute, click on the "Add Attribute" button:

LES ATTRIBUTS

Mon ...

Jean Martin

LES ATTRIBUTS
